

EuroMABNet Workshop

<https://www.euromabnet.com/>

Antibodies: the good, the bad and the really ugly

22nd of September 2016

Hotel Ambassador, Opatija, Croatia

Organizer: Center for Proteomics
Faculty of Medicine University of Rijeka &
EuroMABNet

EuroMABNet
European Monoclonal Antibodies Network

Antibody not working?

Weird bands on your blots?

Positive signal in your negative control?

Learn how to avoid problems with monoclonal antibodies!

The workshop is aimed at **younger** researchers and will provide a set of criteria and recommendations that will help researchers to select the most effective monoclonal antibodies from those available in the market and provide the strategic guidance needed to perform any essential antibody validation. This will include verifying antibody specificity, selectivity, sensitivity and reproducibility.

The workshop is FREE!

Meeting participant are encouraged (but not obliged) to submit a one page **abstract (maximum 300 words)** about their work. The best **4 abstracts from younger scientists and PhD students** will be selected for a short talk (10 minutes) presentation during the EuroMABNet meeting. Best 10 abstracts from students and young scientists coming outside from Croatia will receive 500 € travel grant, courtesy of EFIS.

Please send abstracts to: groncador@cnio.es
